Descendants of Alexander Wilson (1758-1822)
Through 5-Generations

The following article attempts to identify the known descendants of Alexander Wilson (born 1758 in Aberdeenshire, Scotland) who emigrated from Scotland and settled in Quebec. Alexander first appeared in Quebec City in 1783, and married Sarah Kelly. After Sarah's death Alexander married Angelique Catherine D'Alliboust.

Between these two marriages, Alexander fathered either 17 or 18 children, depending on the source material. From these offspring, there were over 1,400 descendants in 5 generations.

Much of the information included in this document was sourced through Ancestry.com. Church records (baptismal, marriage, funerial) kept by the parishes comprise much of the detailed information, along with census data. Online family trees were reviewed when available, but were not relied on to verify any individual. In some instances, names of spouses or offspring may have been omitted, if no records identifying those persons were located.

An attempt was made to clearly identify a person's common name, as many of the baptismal records include honorific first names (i.e. Joseph and Marie) which were not always used to identify the person during their life. In these cases, the honorific name may be included as an initial in this text.

Each individual descendant has been identified by a unique number, based on their birth order. Some individuals may have been inadvertently omitted if records for them were not readily available.
